

HFCF - Compact

Ceiling Concealed Type 400 – 1,200 CFM

Chilled Water Fan Coil Units

Model 04-12 Series 50Hz

TRANE
TECHNOLOGIES

Features and Benefits Overview

HFCF-Compact is another leap over the leading HFCF-Compact, working everywhere around the world. HFCF-Compact meets the standards of today's market, as well as the anticipated needs of tomorrow's market. The tradition that company founder Reuben Trane began in the 1930s continues with the latest generation of fan-coils from The Trane Company. The best design we are offering by HFCF-Compact:

- High efficiency blue fin coil with hydrophilic coating, allowing best heat exchange efficiency, condensation carryover and anti-corrosion capability.
- Large diameter and multiple blowers to reduce noise level
- Various ESP (External Static Pressure) motor options to provide more precise matches.
- Easy maintenance and service.
- Reliable performance that fully tested under accredit laboratory and certified with AHRI 440-2019 Certification.

HFCF-Compact with Return Plenum Components & Features

Features and Benefits

Easy Maintenance

HFCF-Compact is designed with compact casing size and slim cabinet height, it is especially suitable for the installation for confined building space. The components are designed to provide flexible onsite installation and ease of maintenance.

Backward Remove Panel Cover

The backward remove panel cover direction is easier for the service in the confined space or building.

Interchangeable Filter Withdraw Direction

The HFCF-Compact is designed with different withdraw directions, suitable for different kind of installation types and applications. The multi-pieces filters design are applied, it is easier remove filter from confine space or service manhole.

Easy Piping Installation

The water pipe designed with connection 3/4" FPT (female pipe thread), easy to connect, totally reduce the installation time and labor.

Filtrations (Options)

HFCF-Compact offers different types of filtration options and filtration efficiency for the specific requirements of your application (e.g. residential, healthcare, industrial). Multi-pieces of filters are used in each unit. It is easy to remove, change or service. The standard filters options are as below, for special options may be provided by request.

Aluminum Mesh Filter

High-strength aluminum mesh filter with aluminum frame. Durable and long service life. Easy to install, clean and low maintenance cost.

Washable Nylon Filter

2 layers Nylon filter with aluminum frame. Lightweight, wear resistant, long service life and strong dust proof performance. Easy and safe to use and replace. Suitable for primary filtration system.

PM 2.5 Filter (Air Cleanser Filter)

Utilize our high-efficiency PM2.5 filter, specifically designed to capture harmful particles smaller than 2.5 micrometers. This filter effectively purifies the air in your space.

Washable G4-Filter

Washable polyester fiber with aluminum frame. High filtration efficiency with low pressure resistance.

Features and Benefits

Accessories (Options)

Control Valve

Standard spring return valve for temperature range adjustment. Provided separately or factory fitted. (For different valve options might be provided by request).

Power Supply	220 - 240 VAC / 50 Hz
Power Consumption	6.5 W
Nominal Pressure	2.1 MPa / 305 psi
Close-Off Pressure	344 kPa / 50 psi
IP-Grade	IP 51
Type	Spring Return / On-Off

Digital Room Thermostat

The factory fitted the thermostat with 3 speed fan adjustment and precise temperature control. The casing is aesthetic appearance with minimal design. Perfectly fit with the indoor decoration.

Power Supply	220 - 240 VAC / 50 Hz
Temp. Accuracy	± 1 °C
Temp. Range	18 – 30 °C

Drain Pan

One-Piece stamping drain-pan manufactured from high quality cold-rolled steel sheet with spray coating; high grade insulation material is securely attached to the drain pan. Stainless-steel material of drain pan are available as options.

Performance Data

HFCF-Compact (3 Rows Coil)

- Nominal air flow range 400 – 1,200 CFM.
- Designed for low to medium static pressure 0.12 and 0.20 in.WG. (30 and 50 Pa).
- High efficiency blue fin coil with hydrophilic coating, condensation carryover and anti-corrosion.
- Well-installed in multiple sheet metal and optimize blower arrangement for sound optimization.
- A one-piece stamped drain pan design without any seams or joints, preventing water leak, and eliminating condensation risk with PE insulation.
- Rear return plenum constructed from galvanized steel to enclose the fan section. The return plenum is compatible with various filter options.
- Fully laboratory tested and rated for reliable performance.
